

Rezaul Islam

Software Engineer

Hello there! I'm a software engineer based in Bangladesh and have been in the industry for the past 7 years.

I've always been fascinated with techs that solve real-world problems. My passion for technologies lies with dreaming up ideas and making them come true with elegant interfaces. I take great care in the experience, architecture, and code quality of the things I build.

PROFESSIONAL EXPERIENCE

2023 **Markopolo** | [Senior Software Engineer](#)

2024 At Markopolo, one of Bangladesh's leading startups, I specialized in backend development, where I played a key role in building an automatic optimization system for ad platforms, including Google Ads, Meta Ads, Yahoo Japan, and TikTok. During my tenure, the company successfully raised \$2.5 million in seed funding. My work involved utilizing Express.js and Python

to develop API servers and implement cron jobs for various services.

2022 Seekr | [Senior Software Engineer](#)

2023

Seekr is a Hong Kong-based company that revolutionizes human interaction through AI and intuitive designs for visually impaired individuals. During my time at Seekr, I developed Android and iOS apps using Flutter, enabling visually impaired users to perceive and understand their surroundings, navigate, read books, and order from restaurant menus. I optimized the text-reading feature, developed touch-and-feel interactivity, and built an analytical server to monitor user behavior. The app functions with both the Seekr device and phone cameras. My contributions helped Seekr secure a spot in the Top 10 at HKTDC Start-up Express 2024, gain recognition on Yahoo News, and become a finalist in the Fowler Global Social Innovation Challenge.

2022 Fabric Lagbe | [Mobile App developer](#)

2023

Fabric Lagbe Ltd. is a rising marketplace startup in Bangladesh, dedicated to connecting national and international buyers with local manufacturers and traders for fabrics, yarns, cotton, ready-made garments, machinery, trims, and accessories. At Fabric Lagbe, I redeveloped their eCommerce app from the ground up to resolve critical bugs caused by earlier

development decisions. My contributions were instrumental in helping the company secure 10 million BDT at Startup Bangladesh, an event hosted by the Ministry of ICT, Bangladesh.

2020 Everforth | [Software Engineer](#)

-

2022

Everforth is a Japan-based group of design and technology specialists that supports the sustainable development of organizations, from startups to large corporations. At Everforth, I primarily worked on web apps using NuxtJS and mobile apps using Flutter. Here I thoroughly enjoyed the collaborative working environment and gained valuable insights from Japanese culture.

2018 Mobile App Training Program, Ministry of ICT | [Flutter Trainer](#)

-

2020

I worked as a Mobile Application development trainer, my Posting was at Manikganj which is 150km away from Dhaka. Here I got an opportunity of connecting with local youth and sharing my hard earned knowledges and experiences with them. I am pleased to inform that I was able to pull up 5 enthusiast developers who are working professionally now.

2020 Ricciwawa | [Mobile Application Developer](#)

-

2021

Ricciwawa, a Hong Kong-based startup, tackled Chinese language learning challenges with a high-tech social platform. I contributed to implementing advanced features like OCR, Text-to-Speech, Speech-to-Text, and video editing in a TikTok-like interface. Despite limited resources, we developed unique solutions to overcome system challenges.
